

PGA TOUR 2021/22

Scoring Rating 2022

(January 1st – April 24th)

Ratings are calculated by comparing a player's average round score for an event, against the tournament average for the Top-25 finishers from that week.

For example: *If a player's scoring average for an event is 71.5 (286), when that week's average for the top 25 finishers is 72.89, then this player will have a rating of +1.39. A golfer whose rating is a minus number (such as – 1.56), will have scored worse than the collective top-25 averages for that week. Thus the majority of golfers will have a minus number.*

*The final rating is worked out by calculating the average of a player's total collection of ratings – provided they have participated in a **minimum five tournaments during this period**. Those who fail to complete 36 holes at an event are not included for that week's statistics. Match Play and team events not included.*
