Scoring Ratings For The Month Of January (2017-20)

(Note: Min. No. of Rounds = 20)

Ratings are calculated by comparing a player's average round score in an event, against the tournament average for that week.

For example: If a player's scoring average for an event is 71.5 (286), when that week's tournament average is 72.89, then this player will have a rating of +1.39. A golfer whose rating is a minus number (such as – 1.56), will have scored worse than the tournament average for that week.

Thus, a golfer whose average is 72 (288), when that week's overall average is 73.88, will have a better weekly rating than someone who fires 285 (71.25) in a tournament where the average round score is 71.86.

The final rating is worked out by calculating the average of a player's total collection of ratings – provided they have completed a minimum of 20 rounds in **January** during the four-year period (2017-20).

To qualify for a weekly rating, a golfer must have completed a minimum of 36 holes in a tournament.
