PGA TOUR SCORING ANALYSIS

Six-Month Scoring Ratings (Since May 1st, 2023)

El Cardonal (November 2nd-5th)

Ratings are calculated by comparing a player's average round score in an event, against the tournament average for that week's Top-25 Finishers.

For example: *If a player's scoring average for an event is 71.5 (286), when that week's tournament average for the Top 25 Finishers is 72.89, then this player will have a rating of +1.39. A golfer whose rating is a minus number (such as - 1.56), will have scored 1.56 strokes higher per round than the T25 average for that week.*

Thus, a golfer whose average is 72 (288), when that week's T25 average is 73.88, will have a better weekly rating than someone who fires 285 (71.25) in a tournament where the average T25 round score is 71.86.

*The final rating is worked out by calculating the average of a player's total collection of ratings – provided they have completed a **minimum of 20 rounds in PGA Tour events since May 1st this year.***

Only those entered this week are included in the table below (Top 60 Pros Are Listed).
